

Surgeries performed by our team may be financed either by the NFZ (National Health Fund) or by the patients themselves. The quality of the performance, implants or the method followed – they're all the same, as we always use our best knowledge and experience.

The reason behind the long queues for NFZ funded procedures is a high number of patients. If there's an emergency, no possibility to wait or a patient simply wishes to choose the surgery date, we can always appoint a closer date.

Due to the fact that there might appear pain ailments, that patients need to be supervised after the surgery, the cost of the surgery always includes one night at the hospital plus nurse care. All other costs are included in the price, too: frequently indispensable expensive implants (screws, anchors), administered drugs, histopathological examination or energizing breakfast. The majority of private procedures is performed at the Arthro Medical surgical ward in Piotrków Trybunalski or in MegaMed.

KNEE

The kind of surgery	Total price [PLN]
Therapeutic knee arthroscopy – partial meniscectomy, cartilage damage debridement, synovium folds removal, removal of the osteophytes and alike procedures	3 800
Therapeutic knee arthroscopy – synovectomy, joint contracture release, capsulotomy, suturing of the menisci tears without implants, patella instabilities, jumper's knee treatment and alike procedures	4 200
Arthroscopic suturing of massive meniscus tear, suturing of both menisci	4 500
Arthroscopic surgery with LCL or MCL reconstruction	7 500 - 9 000
Postero lateral corner reconstruction with LCL reconstruction (La Prade method)	9 500 - 12 800
Arthroscopy + ACL reconstruction	7 000 - 9 500
Knee arthroscopy with arthroscopic treatment of Osgood-Schlatter's disease	4 200

Knee arthroscopy with Fulcerson's osteotomy	4 800 - 5 500
Mini open Fulkerson's osteotomy	4 000
MPFL reconstruction + arthroscopy (lateral release and so on)	7 500 - 8 500
MPFL + MPTL reconstruction + Elmslie - Trillat procedure + arthroscopy	8 000 - 9 500
Arthroscopic ACL reconstruction with titanic screws after previous multi stage procedures	6 500
Arthroscopic ACL reconstruction with the use of endobutton (without arthroscopic treatment of additional diseases) + arthroscopy	7 500
Arthroscopic ACL reconstruction with the use of bioabsorbable screws	8 000
Arthroscopic PCL reconstruction with double stabilization in the tibial tunnel	8 500 - 9 500
Arthroscopic PCL reconstruction with double stabilization in the tibial and femoral tunnels	9000 - 10000
Arthroscopic one - stage PCL re-reconstruction, depending on the sort of implants	10000-13000
Arthroscopic one - stage ACL re-reconstruction, depending on the sort of implants	8500 - 11000

POPLITEAL CYST, BAKER'S CYST

The kind of surgery	Total price [PLN]
Therapeutic knee arthroscopy with arthroscopic Baker's cyst and valvular mechanism removal	4 500 - 5 500

SHOULDER

The kind of surgery	Total price [PLN]
Therapeutic shoulder arthroscopy	7 000
Therapeutic arthroscopy + long head of biceps muscle tears treatment	7 500 - 8 000
Arthroscopic treatment of scapulo humeral joint	8 000 - 9

instabilities	800
Arthroscopic treatment of scapulo humeral joint instabilities + remplissage	8 700 - 10500
Scapulo humeral joint instability treatment with Latarjet's osteoplasty	7 000 - 9 000
Arthroscopic treatment of rotator cuff tears, depending on the sort of implants	8 500 - 12000
Mini open clavio brachial joint reconstruction	7 800

ANKLE, TALO CALCANEAL JOINT AND THE FOOT

The kind of surgery	Total price [PLN]
Therapeutic arthroscopy of the tibio talar joint	3 800
Therapeutic arthroscopy of the talo calcaneal	3 800
Endoscopic treatment of Achilles tendon's, posterior tibial tendon's and fibular tendon's tendinopathies	3 800 - 4 500
Surgical treatment of damages and calcaneal attachment of Achilles tendon entezopathy	6 700 - 7 800
Inveterate Achilles tendon damage plasty	6 800 - 7 800
Ankle instability surgery	6 200 - 8 500
Insufficiency of the tibial posterior muscle	7 000 - 9 500
Removal of the accesory saphenous bone with the subsequent fixation of the tibial posterior muscle tendon	3 800
Hallux bursectomy with soft tissue correction and osteotomy of the first metatarsal bone - Hallux surgery (one side)	2 500 - 3 000
One stage malleolar toe correction with hallux valgus correction	3 000 - 3 400
Fixing material removal from the foot	1 500
Malleolar toe correction	1 800

HIP

The kind of surgery	Total price [PLN]
Ilio tibial tract plasty – Mini open treatment of the external snapping hip	2 800
Endoscopic treatment of the snapping hip	3 800
CAM / Pincer hip surgical arthroscopy	8 500 - 10000
CAM / Pincer hip surgical arthroscopy + labrum correction	8 800 - 12000
Mini open CAM / Pincer hip plasty	7 500 - 9 000
Mini open CAM / Pincer hip plasty + labrum correction	8 200 - 9 800

ELBOW

The kind of surgery	Total price [PLN]
Therapeutic elbow arthroscopy	4 000
Arthroscopic treatment of the elbow contracture	5 000 - 7 000
Surgical treatment of the ulnar nerve groove	3 000 - 3 500
Local removal of the pathologically changed bony and soft tissues (humeral bone) – tennis elbow surgery	2 800
Arthroscopic plasty of the tennis elbow	3 800

WRIST, ARM

The kind of surgery	Total price [PLN]
Surgical arthroscopy of the wrist	3 800
Arthroscopy + wrist ganglion removal	3 900
Arthroscopic triangular cartilage reconstruction	4 500 - 6 200
Arthroscopic plasty of the wrist instability	4 200 - 6 000

Dupuytren's contracture treatment, Dupuytren's disease	1 800 - 2 500
Carpal tunnel release – carpal tunnel syndrome / Guyon's tunnel syndrome	2 000 - 2 700
Arthroscopic treatment of the carpal tunnel syndrome	2 500
Tenovaginitis – constricting tenovaginitis and de Quervain's disease	1 900
Tenovaginitis of the hand – snapping finger	1 500
Surgical arthroscopy of the CMC joint of the thumb	3 500
Surgical arthroscopy of the CMC joint of the thumb + bio interposition in instability	4 400 - 5 200
Removal of fixing material removal from the hand	1 500

OTHER PROCEDURES

The kind of surgery	Total price [PLN]
Bursectomy	1 000 - 1 500
Arthroscopic bursectomy	2 800
Removal of soft tissue pathological changes (atheromas, lipomas, fibromas with histopathological examination)	1 500 - 1 800
Surgical debridement and excision of the wound, infection area, burn area – ingrowing nail plasty	1 800
Ganglion removal (primary)	1 700
